

Questions & Answers
Solicitation No. PR11443343 - ICASS Cable pull for Wi-Fi

Question 1. According to SOW each drop will consist of RJ-45 terminated connection at the distant end. What kind of RJ-45 connection should it be – outlet or plug?

Answer: According to the SOW “**Each drop will consist of RJ-45 terminated connection at the distant end**”. It is not specified, if it should be an outlet or a plug. So, it can be any of those. Outlet and plugs are both ok for our WiFi installers.

Question 2. What type of cable and its specification is preferable?

Answer: 2. SOW has all our requirements to the cable. We are not adding any additional requirements.
