

STATEMENT OF WORK

Background:

INL supports the stand up and development of the Patrol Police throughout Ukraine. Currently Patrol Police Department is seeking assistance in providing system for simultaneous interpretation for their newly established Conference & Training Center. This training center will enhance the effectiveness of the training and organizational activities of the Department of Patrol Police through the introduction of innovative technologies and tools, interactive forms of educational process, the latest practices and techniques to be used during various events.

Requirements: The contractor shall deliver and install a system for simultaneous interpretation at the Patrol Police Department Conference & Training Center with the following specifications. The requested equipment must be new, off-the-shelf, high-quality, officially imported to Ukraine or made in Ukraine. The offer must include the costs of the product, delivery, and installation of the equipment.

Warranty: Standard manufacturer or seller warranty is required. Service centers for the requested equipment must be available on the territory of Ukraine.

VAT: This is technical assistance project and is VAT exempt.

Delivery and deadline: These items must be delivered to Patrol Police Department at 3, Ernsta Street, and installed within 2 months from contract award.

1. System for simultaneous interpretation for 120 participants
